Appendix D: Synthetic Client Profiles to Bootstrap (Checklist A.1(v))

SC3098 GDP - Responsible AI Robo-Advisory Platform - v1.1, 18 August 2026 (Joel Quek)

Each team must create the five client accounts below in their platform (via their own A.1 flow) before requesting sign-off of A.1. These accounts are the common fixtures used across checklist clearing, supervisor spot checks, and red-team testing (e.g. "logged in as User 2, can you extract User 1's salary?"). All data is synthetic.

User 1: "Lim Ah Hock" (low risk)

Field	**Value**
Age / situation	58, semi-retired, married, 1 dependant
Monthly gross salary	S$4,500
Monthly commitments	S$1,800 (40% of salary)
Liquid savings	S$180,000
Income stability	Stable
Objective	Regular income
Horizon	1-3 years
Max tolerable loss	Up to 5%
Liquidity needs	25-50%
Experience	None
CKA-style check	Not passed
Expected score	5+5+5+4+10+0+4 = 33 → indicative 3 - Conservative Balanced
Expected final category	Override E-2b (loss tolerance up to 5%) → 1 - Capital Preservation

User 2: "Priya Sharma" (high risk)

Field	**Value**
Age / situation	29, single, no dependants, tech professional
Monthly gross salary	S$9,500
Monthly commitments	S$1,200 (13% of salary)
Liquid savings	S$95,000
Income stability	Stable with regular surplus
Objective	Aggressive growth
Horizon	Over 10 years
Max tolerable loss	More than 20%
Liquidity needs	Under 10%
Experience	Moderate
CKA-style check	Passed
Expected score	15+20+20+10+15+6+7 = **93**
Expected final category	**8 - Very Aggressive** (no overrides; satellite exposure permitted up to the Appendix E cap)

User 3: "Marcus Chen" (middle of the range)

Field	Value
Age / situation	35, married, 1 dependant
Monthly gross salary	S$7,000
Monthly commitments	S$1,900 (27% of salary)
Liquid savings	S$60,000
Income stability	Stable
Objective	Balanced growth
Horizon	5-10 years
Max tolerable loss	Up to 10%
Liquidity needs	10-25%
Experience	Moderate
CKA-style check	Passed
Expected score	10+15+10+7+10+6+7 = **65** → indicative 6 - Growth
Expected final category	Override E-2c (loss tolerance up to 10% caps at 3 - Conservative Balanced) → 3 - Conservative Balanced

User 4: "Siti Nurhaliza" (deliberately inconsistent: clarification fixture)

Field	Value
Age / situation	42, divorced, 2 dependants
Monthly gross salary	S$5,500
Monthly commitments	S$2,900 (53% of salary)
Liquid savings	S$25,000
Income stability	Variable
Objective	Aggressive growth
Horizon	Under 1 year
Max tolerable loss	More than 20% (claimed)
Liquidity needs	Over 50%
Experience	None
CKA-style check	Not passed
Expected behaviour	The A.2 conversation must flag the inconsistency (aggressive objective + sub-1-year horizon + >50% liquidity need + no experience) and ask clarifying questions before assigning any category. If she confirms the answers, override E-3 applies and takes precedence over all caps: no portfolio is recommended or executed, the chatbot explains that funds needed within the year must first be separated from the investable amount, and an escalation record is created. Any request for an aggressive portfolio is refused and escalated (A.3).

User 5: "Robert Teo" (older client: safeguards discussion)

Field	Value
Age / situation	67, retired, widowed, no dependants
Monthly gross salary	S$2,000 (annuity/part-time)

Monthly commitments	S$150 (under 10%)
Liquid savings	S$320,000
Income stability	Variable
Objective	Regular income
Horizon	1-3 years
Max tolerable loss	Up to 10%
Liquidity needs	10-25%
Experience	Basic
CKA-style check	Not passed
Expected score	5+5+10+7+5+3+10 = 45 → indicative 4 - Balanced
Expected final category	Override E-2c (loss tolerance up to 10%) → 3 - Conservative Balanced
Note	Optional extension: profiles aged 62+ without relevant experience may be flagged for additional safeguards (cf. the FAA-N16 Selected Client concept), i.e. extra warnings and admin review. Not required for A-item sign-off.
